

TRUST CONFERENCE OPENS IN CHICAGO

Representative Men In Attendance.

PRESENT FROM ALL PARTS OF THE UNITED STATES.

Morning Session Given Over to Addresses of Welcome and Organization—First Speakers Were Professors Jenks of Cornell, and Adams of Wisconsin.—Both Placed Each Side of the Question Before the Delegates—John Hayes Refuses to Sit With New Jersey Contingent.

Chicago, Sept. 13.—[Special]—The Trust conference opened here this morning. Representative men from all parts of the country are in attendance.

The morning session was given over to addresses of welcome and organization. The first speakers on the subject of the gathering were Prof. Jenks of Cornell, and Prof. Adams of the University of Wisconsin. Both placed each side of the question before the delegates, making no arguments for or against trusts. While the matter of organization was being discussed, John Hayes, secretary of the Knights of Labor, created a scene by refusing to sit with the New Jersey delegates, and insisted upon the selection of the members of the committee on permanent organization from each national body as well as state.

Chicago, Sept. 13.—The Civic federation's trust conference, which has attracted political economists and prom-

FRANKLIN H. HEAD

inent public men from all parts of the United States, began this morning at 10:30 o'clock in Central Music hall.

Neither Gov. Tanner nor Mayor Harrison was able to attend. Gov. Tanner was represented by Atty.-Gen. E. C. Akin. The governor is so seriously ill it is doubtful if he can leave his bed for some time to come. Mayor Harrison had given out positively that he would be in attendance, but illness rendered it impossible for him to leave for Chicago as he expected. He was represented by Howard S. Taylor.

The program as approved is as follows:

Call to order in Central Music hall at 10 a. m. by Franklin H. Head, president of the Civic federation.

Short address by Mr. Head.

Reading of the call by R. M. Easley, secretary Civic federation.

Presentation of problems for consideration by Prof. J. W. Jenks and Prof. H. C. Adams.

Address of welcome in behalf of the city by H. S. Taylor, representing Mayor Harrison.

Election of officers for temporary organization.

Appointment of committees on credentials, order of business and program.

Late last night a list of those who have sent word that they will certainly be present was made up by the Civic federation. It includes the names of a large number of men who are prominent as educators, writers, theorists and those who occupy notable positions in life. There are several anarchists among them. The delegates are from all parts of the country. Five governors' names appear on the list, but Gov. Tanner, after sending his acceptance found it impossible to come.

One of the features of the convention is the fact that there will be twelve attorneys-general in attendance, who are expected to take an active part in the discussion of the part that states must play in the suppression of trusts.

On the list are fourteen congressmen, but the majority of them have announced that they will come to listen. They have stated in their messages to the Civic federation that they do not intend to commit themselves to any line of action, but they will absorb the views of others. Seventeen of the delegates are either college presidents or at the head of the department of political economy in some well-known institution.

From the list of speakers it appears that the solutions of the trust problem which will be offered will vary greatly. Labor leaders, college professors and politicians are all to outline their views. Some of the speakers are among the best-known political economists in the country. Prof. Jenks and

Prof. Adams are to outline the problems which confront the conference, and to them are assigned the opening papers.

The city insurance agents were the chief witnesses and the complaint was that Chief Anderson had not cleared a break between the fire in the dry kiln and the wreck of the main building. JACKSON AND MCKEY AHEAD

Two Janesville Men Hold All Amateur Tobacco Harvesting Records

District Attorney William A. Jackson and George M. McKey now hold all of the amateur long distance tobacco harvesting records for Jefferson county, and are ready to cut, pile, spud, or shed in defense of their well earned titles at any time. It was this way.

The district attorney was the guest of Mr. McKey at Lake Koshkonong. Mr. McKey, a farmer living near the Carcajon club grounds, injured his hand so that he was unable to work at a time when his crop had to be harvested at once, or become a total loss. Atwood couldn't hire a man for love or money, as every one was busy, and help was at a premium. Hence, the neighbors formed a "bee" to put Atwood's lot into the shed. The Carcajon club volunteers were H. L. Skavlem, District Attorney Jackson and Mr. McKey. Mr. Skavlem was an old hand at the business, he having raised tobacco himself, as well as manufacturing it into "Carcajon mixtures," but Jackson and McKey had always bought theirs in preference to raising it. The "bee" began business at eight o'clock in the morning, the three Janesville men being the first on the ground, and the work was not finished until 4 p. m.

"First we cut the leaf," said the district attorney as he nursed a blister on his palm, "and then we piled it up to wilt. Then it had to be spudded, and later loaded onto a wagon and carried to a shed, where it was hung up. We cut four or five rows apiece, and then piled, spudded and hauled it. Us tenderfeet were given a pretty good test, but we hung on. My wagon held several more loads than any other, but it made its trips just the same. We got the crop in all right, but it was a pretty hard day's work."

Mr. Atwood was greatly pleased at the kindness shown him by the men who made up the "bee," for getting the crop into the shed was an important matter with him.

Jones gave a very enjoyable entertainment with his graphophone grand and received a vote of thanks from the members.

Text of Note Made Public

Brussels, Sept. 13.—[Special]—The full text of Great Britain's note to the Transvaal was made public here today by the Boer agency. It does not differ from the summary telegraphed from Pretoria, except that England insists that the question of suzerainty cannot be discussed.

In Chamberlain's note to England he absolutely repudiates the assumption that the Transvaal is a sovereign international state.

Pretoria, Sept. 13.—Great Britain's reply to the Transvaal government's propositions was read in the volksraad Tuesday amid the greatest excitement. The note is virtually an ultimatum and the situation is acute.

The dispatch was formulated and sent from London after last Friday's meeting of the British cabinet.

It is officially announced that the law confiscating mines owned by persons accused of high treason will be again enforced. The Transvaal government will take charge of such mines and work them after they have been closed for a certain length of time.

Demands of Great Britain.

London, Sept. 14.—A dispatch to Dailies' news agency says that Great Britain in her reply to the Transvaal proposes:

1. A five-year franchise.
2. A quarter representation in the volksraad for the gold fields.
3. Equality of the Dutch and English in the volksraad.
4. Equality of the old and new burghers regarding the presidential and other elections.

If the foregoing proposals are accepted a conference will follow for the purpose of drafting the necessary measures.

In order to avoid unnecessary conditions being introduced by the Transvaal government or new bills being enacted aiming to defeat the proposals, Great Britain demands a definite acceptance without delay.

Otherwise Great Britain will immediately reconsider the whole situation and act so as to insure a settlement. It should be remarked that this account of the British demands rests solely on the authority of the news agency named.

This is believed to mean that the Transvaal will insist upon the renunciation of British suzerainty.

British Authorities at Hongkong Refuse to Clear the Tartar.

Hongkong, Sept. 13.—The harbor department notified United States Consul-General Wildman that, on account of overcrowding, it would decline to clear the transport Tartar, which is on its way to New York with returning volunteers. The vessel's license permits it to carry only 750 passengers, whereas the war department thinks it good for 1,245 soldiers. This action on the part of the British authorities is taken, it is understood, at the instance of the volunteers, who have filed with the consul-general a formal complaint regarding the transport's unsanitary condition.

Mr. Wildman protested against the harbor authorities' action, and submitted the matter to the governor, Sir Henry Blake. If he ratifies the refusal to clear 450 soldiers must be left behind when the Tartar sails.

WOMEN do suffer!

Even so-called healthy women suffer!

But they are not healthy!

The marks left by pain are on the young faces of many of our daughters. Pain that leaves its mark comes from a curable cause.

If that cause is not removed its influence reaches out and overshadows a whole life. The reason Lydia E. Pinkham's Vegetable Compound has been so uniformly successful for over a quarter of a century in overcoming the suffering of women, is that it is thorough and goes directly to the cause. It is a woman's

remedy for woman's ills.

MISS EMILY E. HAAS, of 148 Freeman St., Greenpoint, Brooklyn, N. Y., writes:

"DEAR MRS. PINKHAM—I wish to state that I used your Vegetable Compound with the greatest success. I was very sick for nearly a year with hysteria, was down-hearted and nervous; also suffered with painful menstruation and pain in back and limbs. I often wished for death, thinking nothing would cure me. I had doctors, but their medicines did me no good. At last, by the advice of a friend, I began to take Lydia E. Pinkham's Vegetable Compound, and I am happy to say it has entirely cured me."

JENNIE SHERMAN, of Fremont, Mich., Box 743, writes:

"DEAR MRS. PINKHAM—I feel that I must write you and tell you what your medicine has done for me. I had neuralgia of the stomach for two years, so bad that I could not do any work. I had two or three doctors, but did not seem to get any better. I began taking Lydia E. Pinkham's Vegetable Compound and Liver Pills and improved from the first, had better appetite, and after taking three bottles of Compound and one box of Liver Pills, can say that I am cured. Your Vegetable Compound is a wonderful medicine."

Grave Fears for Dreyfus.

Rennes, Sept. 13.—Grave fears are entertained for the health of Dreyfus. Dr. Pesei, a celebrated physician, after a careful and thorough examination, says the prisoner is a dead man, and that his constitution is hopelessly undermined, despite his calm and outward appearance. Foul-Smelling Catarrh.

Catarrh is one of the most obstinate diseases, and hence the most difficult to get rid of.

There is but one way to cure it. The disease is in the blood, and all the sprays, washes and inhaling mixtures in the world can have no permanent effect whatever upon it. Swift's Specific cures Catarrh permanently, for it is the only remedy which can reach the disease and force it from the blood.

Mr. B. P. McAllister, of Harrodsburg, Ky., had Catarrh for years. He writes: "I could see no improvement whatever, though I was constantly treated with sprays and washes, and different inhaling remedies. In fact, I could feel that each winter I was worse than the year previous. Finally it was brought to my notice that Catarrh was a blood disease, and after thinking over the matter, I saw it was unreasonable to expect to be cured by remedies which only reached the surface. I then decided to try S. S. S., and after a few bottles were used, I noticed a perceptible improvement. Continuing the course, the disease was forced out of my system, and a complete cure was the result. I advise all who have this dreadful disease to abandon their local treatment, which has never done them any good, and take S. S. S., a remedy that can reach the disease and cure it."

To continue the wrong treatment for Catarrh is to continue to suffer. Swift's Specific is a real blood remedy, and cures obstinate, deep-seated diseases, which other remedies have no effect whatever upon. It promptly reaches Catarrh, and never fails to cure even the most aggravated cases.

S. S. S. For The Blood

Coal Goes Up Another Notch.

And still you linger. Can hardly blame you, though -- this Coal question is a hard one to decide. But there is every reason for its going still higher, and but little chance for its going the other way. If you are going to put in the winter's supply, don't think "any Coal is good enough." Get the best that your money will buy.

Schuylkill Coal

Has no superior. It is ninety per cent. pure, gives more heat to the same quantity than most other Coals.

A Favorite Everywhere

The qualities that have made this malt tonic popular with people everywhere are purity, palatability, malt strength. Then, too, it is a non-intoxicant.

Blatz Malt-Vivine excels all other tonics as a producer of flesh, blood and sound nerves. Tell your druggist that you want BLATZ MALT-VIVINE. If he suggests any other kind of malt preparation, go elsewhere, and get the genuine. Highest Awards at Trans-Miss. and International Exposition, 1898.

EDISON'S NEW LAMP.

Filament is Covered with a White Coating of Rare Earth.

In a recently patented lamp devised by Thomas A. Edison the filament consists of a highly refractory, porous, non-conducting material of rare earth oxide, incorporated in the body thereof are isolated particles of carbon, between which are spark gaps, whereby high tension currents, either alternating, continuous, or intermittent, will be conducted from particle to particle of the carbon and thus raise the filament to incandescence. As the filament is of a highly refractory, non-conducting, porous material, the interior will be subjected to the effect of the vacuum in the globe, which will assist in the conduction of the current through the carbon particles. The highly refractory material consists of an oxide or oxides of the rare earths, such as oxide of zirconium or thorium. In order to provide an exterior surface for the filament which will radiate light it is momentarily dipped in the salt of the oxide, such as the acetate, which will leave no carbon upon carbonization, and provide a white radiating surface. In making the filament, a compound, such as a solution of sugar, asphalt, or a tartrate of the oxide itself, is mixed with the refractory material, a residue of carbon thus resulting upon carbonization. The mixture is forced by heavy pressure through a small opening and guided to form a filament of the desired cross-section, which is then bent into proper shape, carefully dried and carbonized. Owing to its high resistance, a voltage of several hundred is necessary in operation. The filament may also be formed by soaking threads of cotton in the salt of the oxide, such as acetate, and carbonized to form a deposit of the oxide thereon; then res soaked and reheated successively until the desired quantity of oxide has been deposited, after which the filament may be soaked in the carbonizing substance; after being dried, it is dipped in a solution of a salt of the oxide of a rare earth, such as zirconia or thorium, preferably an acetate of such oxide, to form the white radiating coating desired.—*Electrical World.*

NONE SO POPULAR.

It is Daily Gaining Favor in Janesville.

Results Reported From People Who Have Given a Fair Trial to the Remedy.

Morrow's Kid-ne-o-ids, the scientific kidney remedy and backache cure, is daily gaining favor in this city. No medicine has ever been sold in Janesville for kidney ailments, backache, nervousness, sleeplessness and general debility that has gained such popular favor as Morrow's Kid-ne-o-ids.

We give you the experience of Mrs. James Casey, 64 5th ave., says: "I have been troubled for two years with pain across the small of my back. I suffered a great deal from rheumatism, in my shoulders and other symptoms of kidney trouble. I tried different kinds of kidney remedies, but failed to get relief. Recently I heard about Morrow's Kid-ne-o-ids and convinced to give it a trial. By using Kid-ne-o-ids I have been entirely relieved of kidney backache and rheumatism. My son has been completely cured of backache, sick and nervous headaches, by using Kid-ne-o-ids and Morrow's Liver-lax."

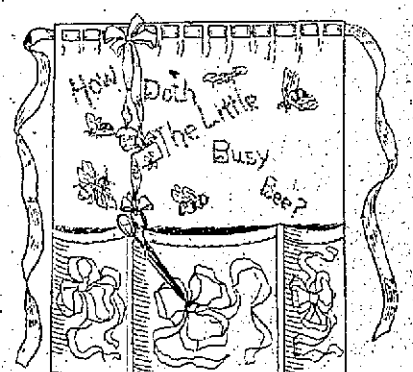

Morrow's Kid-ne-o-ids are not pills, but yellow tablets, and sell at fifty cents a box at all druggists and by The People's Drug Co.

Mailed on receipt of price. Manufactured by John Morrow & Co., chemists, Springfield, Ohio.

A Dainty Work Apron.

A Fetching Little Affair With Useful Pockets, Needlebook, Etc.

The dainty and useful little work apron here illustrated The Designer describes as made of white Japanese silk. The upper edge is turned down in an inch wide hem and the front part drawn, hemstitched and a yellow satin ribbon run in and out of the open work for strings. The sides are simply hemstitched, also the top of the deep pocket, which is turned up at the bottom. On the plain portion of the apron are worked bees in black and yellow silk, and the motto is also worked in yellow silk. The pockets are decorated with a bowknot design.

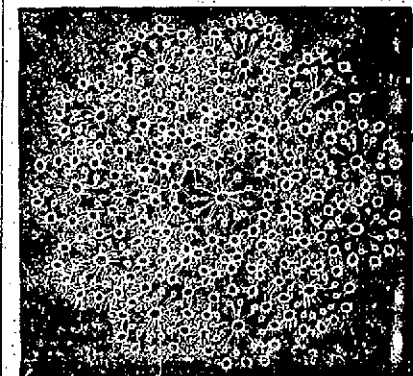

AN EMBROIDERY APRON.

The ribbon being yellow to match the bees and the motto. The ribbon can either be worked solid in satin stitch or made of ribbon twisted in pretty curves and bows and sewed along the edges. From the belt ribbon is suspended by narrow yellow ribbons a white emery seeded with yellow silk and having the leaves at the top worked with yellow, a pair of silver scissors and a yellow silk needlebook, with white flannel leaves, buttonholed along the edges with yellow. A yard of silk will make the apron, about nine inches being turned up for the pocket. If the very wide Japanese silk is purchased, a little will have to be cut from the sides, or the apron will be too wide. For a lace worker the apron might be made of fine linen, with the bowknots put on in lace braid. The center pocket is plenty large enough to hold the work, and the side ones are for the materials.

A Pretty Piece of Tatting.

This dolly is made with No. 50 cotton thread and one shuttle. Begin with the wheel in the center. Make 12 long plects, separated by 2 d s, tie and cut the thread. Six d s, join to a plect, 6 d s, close, turn. Leave one-half inch of thread and make a large ring of 4 d s, 7 plects, separated by 2 d s, 4 d s, turn, and alternate these large and

A TATTED DOLLY.

small rings until you have 12 of each, joining each small one to a plect of the center, and the large ones to each other by their first plects.

Around this wheel make two rows of clove leaves, joining the first row to the wheel and the second row to the first (see cut). Each ring of the leaf is formed of 4 d s, 5 plects, separated by 3 d s, 4 d s and the rings are joined by the first plect. The remainder of the dolly is formed of 11 wheels like the one in the center, with the plects of the center shorter and the large and small rings closer together. Join the wheels to each other, and to the outer row of leaves, as seen in the illustration, which Modern Priscilla gives in connection with these directions.

Cottage Cheese.

The cottage cheese so much seen and used is easily made at home. Use sour milk that has just thickened, but not separated, and put it into a basin. Set it at the back of the fire or in a pan of hot water, where the milk will heat very gradually, but not boil. When the curd has separated from the whey, turn the milk into a colander and let the whey drain off. Put the curd into a bowl, add some salt and a little cream and stir until it is of a fine grain.

Notes From The Jewelers' Circular. Whatever may be the cause of its reappearance, coral is just now filling a niche in the vast temple of fashion.

The snake is a popular shape in trinkets and jewels.

Old silver forms a most artistic mounting for crystals which are beautifully employed in necklaces, pendants, buckles, slides, etc.

The royal purple and rich violet shades of the amethyst greet one on every side.

A dainty new fancy noted is the combination of pearls and coral in fine brooches, the design being a crescent enclosing a star.

Single strings, collars and ropes of pearls are all in fashion.

A magnificent opal encircled with two diamond serpents forms a fascinating and unique pendant.

The center of a very attractive little round brooch is formed by a rosebud, exquisitely carved in coral, and this is framed in a wreath of tiny leaves of frosted gold.

Some of the newest stiff bracelets of a popular order are in graceful, plain round shapes in gold or silver.

THE OTIS GIRLS.

Our Philippine Com-mander Has Three Pretty Daughters.

charming daughters, make their home in the old Otis homestead in Rochester. They have been there since General Otis went to Manila, more than a year ago. Heretofore they have always moved about with him from post to post, but he declined to take them to the other side of the world, although they were anxious to go.

Perhaps the handsomest of General Otis' three daughters is Miss Mary Otis, who is just at present visiting

MISS MARY OTIS.

friends near St. Louis. She is a tall young woman of good figure and is about 19 years old. She has jet black hair and dark brown eyes. Her complexion is a dark olive, which speaks of much life in the open.

Miss Laura Otis is a year or two older, and "Bobbie," as General Otis calls the third sister, is the youngest of the group. She is the daughter of the general's second wife and is 17 years old. All three of the young women are musical, and their home life is especially pleasant.

The Cause In Doubt.

Speaking to a woman's convention, the governor of Colorado remarked: "When the Israelites were broken with dissension, God gave a woman to judge them. Deborah ruled them for 40 years, and the Bible adds, then they had a rest. I have never been clear whether the rest came as a result of her rule or because her reign was ended."

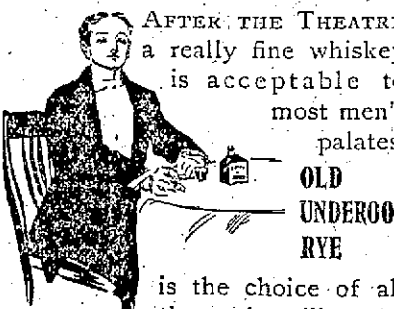

Bad blood and indigestion are deadly enemies to good health. Bardick Blood Bitters destroys them.

A little life may be sacrificed to a sudden attack of croup if you don't have Dr. Thomas' Electric Oil on hand for the emergency.

Scratch, scratch, scratch; unable to attend to business during the day or sleep during the night. Itching piles, horrible plague. Don't's ointment cures. Never fails. At any drug store, 50 cents.

Don't delay a minute. Cholera infantum, dysentery, diarrhea come suddenly. Only safe plan is to have Dr. Fowler's Extract of Wild Strawberry always on hand.

A Wonderful Natural Bridge. Down on Pine creek, near Camp Verde, Ariz., is a natural bridge that is probably greater than any other in the world. It is nearly five times the size of the natural bridge of Virginia, and as a span of more than 500 feet across the creek, which is dry 300 days in the year. The height of the bridge is about eighty feet, and it is about 600 feet wide.

AFTER THE THEATRE a really fine whiskey is acceptable to most men's palates. OLD UNDERWOOD RYE is the choice of all those who will not be satisfied until they get the best. Money and 30 years of experience cannot produce its peer. It is a perfect combination of carefully chosen Whiskies; each one possessed of some peculiarly approved quality, age and flavor. Stored for many years in heavily charred oaken barrels, which adds to its ripeness and flavor. It is its own letter of introduction.

WINE OF CARDUI

How a Woman Suffers.

Howell, Ind., Nov. 26. I will always praise Wine of Cardui. It has done me more good than all the medicines I have ever taken in my life. Please send a book about female diseases to the ladies whose names I enclose.

Mrs. MINNIE STODGHILL.

Wine of Cardui

It isn't necessary for a woman to give particulars. When she says she has "female troubles", other women know what that means. It means days and nights of endless suffering. It means headaches which no tongue can describe. It means terrible bearing and dragging down in the lower abdomen. It means agonizing backache, and shoulder ache, and arm ache, and aches in the lower limbs. It means nerves on edge—the blues—despondency and loss of hope. It means debilitating drains that the doctors call leucorrhoea. It means martyrdom—sometimes even death seems preferable. And still Wine of Cardui will utterly put those diseases and pains to rout. It has cured thousands of cases when nothing else on earth would. To the budding woman, to the bride, to the wife, to the expectant mother, to those going through

the Change of Life, this Vegetable Wine is a blessing.

Ideal Milk Stands All Tests

The point brought up at a "Council" meeting some little time since, regarding the inspection of city milk, would, if enforced, find Ideal Aerated Jersey Milk ready for any test. It is cooled and bottled in the most approved manner, bottles are scalded and thoroughly rinsed and each bottle fitted with a clean, new, wood pulp cork. It will keep well and is perfectly pure. When cream forms on milk and becomes stringy it is impure. Ideal Milk forms perfect cream.

Are always on the alert to get the best and most valuable article in one's possession

SOMETHING FOR NOTHING!

is their motto. In taking advantage of our

Stupendous Shoe Sale!

Every purchaser gets much in value that he does not pay for. It is not the fault of the people, neither are we to blame, but the immense stock of Shoes we purchased at Marinette must be closed out, and that at once. This stock is not an old one, but up-to-date in style and make. Much of it was bought for this fall and winter trade.

We have no room for this stock on our shelves, therefore they are hung on racks and marked at such figures that they will soon be gone.

Remember

This sale will not continue after this Marinette stock is closed out, so come quick and come often while the best goods are at your disposal.
